

MEETING OVERVIEW

Harris County Precinct: 2

Date and Time:

June 28, 2018, 6:00 pm - 8:00 pm

Location:

Baytown Community Center
2407 Market Street
Baytown, TX 77520

Recorded Attendance: 14

Public Comments Received:

New Project or Buyout	3
In Support of Proposed Bond Project	--
Comment	1
Question	1
Other	1

WATERSHED APPROACH

The Flood Control District will focus on completing a general investigation of drainage concerns in the Spring Gully and Goose Creek watershed. The general investigation will involve an analysis of Citizen Service Requests, a review of previous drainage studies, and a public meeting to gather input from citizens. The general investigation will lead to a preliminary engineering report, final design plans, and construction of identified drainage improvement projects. Voluntary home buyouts for structures that meet Flood Control District requirements are also planned for this watershed.

BENEFITS

The proposed investigation and resulting projects would help define drainage benefits in the Spring Gully and Goose Creek watershed. Right-of-way acquisition would preserve floodplain areas and attempt to limit development in areas prone to flooding. Some of the proposed projects would address long-standing drainage issues in the watershed.

COMMUNITY INPUT REVIEW PROCESS

Each public comment was considered individually by the Flood Control District. Comments were reviewed to identify and categorize the ideas, concerns, requests, and information presented. This input was then categorized by theme for incorporation into the proposed Bond Program, and the Flood Control District team responded to each community input comment received. One Citizen Service Request was received. Themes identified for Spring Gully and Goose Creek watershed are detailed below.

COMMUNITY INPUT SUMMARY

From May 30 through August 3, 2018, the Flood Control District received a total of three community input comments related to flood damage reduction concerns in the Spring Gully and Goose Creek watershed.

Community input received included three common themes: concerns about neighborhood flooding, street flooding, and the Highlands Reservoir Dam on Barbers Hill and Madeline Street. Neighborhood flooding is an issue in Highland Ridge subdivision, and the resident providing input felt the Highlands Reservoir Dam contributed to this issue by causing ponding. Another resident sought information regarding the reconstruction of Redell Road and potentially resulting drainage issues. A comment was also submitted regarding drainage channel O500-02-00. The concerns expressed within the Spring Gully and Goose Creek watershed that fall outside of the Flood Control District's jurisdiction require coordination with other municipalities and/or organizations to address these comments.
