## WATERSHED APPROACH

The Flood Control District will focus on completing a general investigation of drainage concerns in the Jackson Bayou watershed. The general investigation involves analysis of Citizen Service Requests, a review of previous drainage studies, and a public meeting to gather input from citizens. The general investigation will lead to a preliminary engineering report, final design plans, and construction of identified drainage improvement projects.

## BENEFITS

The proposed investigation and resulting projects would help define drainage benefits in the Jackson Bayou watershed.

Channel  
Modification

**12.50%**

Other  
Jurisdiction

**62.50%**

**COMMUNITY INPUT REVIEW PROCESS**

Each public comment was considered individually by the Flood Control District. Comments were reviewed to identify and categorize the ideas, concerns, requests, and information presented. This input was then categorized by theme for incorporation into the proposed Bond Program, and the Flood Control District team responded to each community input comment received. Themes identified for Jackson Bayou watershed are detailed below.

**COMMUNITY INPUT SUMMARY**

From May 30 through August 3, 2018, the Flood Control District received a total of 10 community input comments related to flood damage reduction concerns in the Jackson Bayou watershed. Common themes expressed include channel modifications and concerns that fall outside the Flood Control District's jurisdiction.

Comments specifically expressed a need for Gum Gully to be cleaned/maintained from FM 2100 to Foley Road.

Community input that falls outside of the Flood Control District's jurisdiction included local drainage issues due to overland sheet flow and inadequate street drainage. This included sheet flow in upper areas of the watershed that flood area neighborhoods and cause street flooding on Ramsey Road and FM 2100. The concerns expressed within the Jackson Bayou watershed that fall outside of the Flood Control District's jurisdiction require coordination with other municipalities and/or organizations to address these comments.
